EXPERIENCE

2021

PACE CREATIVE GROUP - INTERNSHIP
Create website using Wordpress and XD files

ABOUT ME

- **EXCEPTIONAL COLLABORATION SKILL**

  In my internship as a WordPress developer, I collaborated with designers to find optimal ways to implement a user interface.

- **FRONTEND LEADER IN CAPSTONE PROJECT**

  As a leader, I implemented schedules and built a frontend structure according to the project priorities. I did follow-up with team members frequently to check the progress of the project.

- **TAKE OWNERSHIP OF THE PROJECT AS INDIVIDUAL AND TEAM**

  Took ownership of the project, so I always did my best and delivered my tasks on time. Also, my team members and I helped people who were stuck on their tasks. The project was completed before the deadline. I learned how essential teamwork is and taking ownership of projects is.

- **EAGER TO DEVELOP MAIN SKILL SET**

  After completing the capstone project, I wanted to build a better e-commerce application. I applied lazy loading to my new app, about four times faster than the capstone project. Also, It added four more search options. Using Sass, the application is more efficient, more readable, and easier to maintain.

- **HIGHLY MOTIVATED TO LEARN AND ADOPT NEW TECHNOLOGIES**

  Participated in the Harvest Talent Incubator, a six-week program. In that program, I learned new skills such as Typescript, GraphQL, and Apollo and applied those skills to a project. I was able to build the project one week earlier than the deadline.

EDUCATION

2022

HARVEST TALENT INCUBATOR: FULL STACK DEVELOPMENT

2019 - 2021

SOUTHERN ALBERTA INSTITUTE OF TECHNOLOGY- SAIT
Diploma of Software Development
GPA: 3.92 /4.0

2012

DALE CARNEGIE TRAINING
